

This was presented at the 2018 Conference by the Water Authority.

1. In 2018 we had 12 systems EBR® than other systems. Today we have more systems.
2. As I know, we are the only who have received approval from the Water Authority for the completion of remediation at a gas station.
3. Some of EBR® systems at gas stations have stopped after reaching the threshold values in the approval of the Water Authority for follow-up if there is a rebound.
4. The Water Authority require monitoring after closed system for almost two years.

שיטות הטיפול המיושמות בארץ לטיפול בזיהומי דלק ותעשייה במי תהום
